Experience the South African Holistic Education System - For your child and family

➔ Chrysalis Hub - A holistic one

The vision of a holistic center which is child centric and caters for the needs of the child as a whole - brought about the birth of Chrysalis Hub.

Chrysalis means golden home and like all cocoons, it implies a delicately protected place for growth and development. Within a chrysalis, a caterpillar safely

transforms into a beautiful butterfly.

A stimulating experience for the child:

Chrysalis Hub provides a

protective, nurturing and safe environment filled with loads of enriching, stimulating, fun and learning activities to help each child grow and develop holistically before they fly out into the larger world.

Parents are an integral part:

The centre has an open door policy, where parents are allowed to partake in classroom activities.

Parents can partake in various workshops that help better their parenting skills and self development as well as enhance the bond between parent and child.

The person behind-

The Director, Lydia Sebastian, a South African of Indian origin has worked in the field of education and child development since 1990. A post graduate in Project Management and a Post-grad Diploma holder in Education (University of Pretoria, South Africa), she is an accredited Trainer by ISETT SETA, South Africa. She has worked with children of all age levels; with children who are developmentally delayed, have special needs, traumatised and affected by infectious diseases. Experienced in child care,

development and counselling, she identifies various developmental problems and works out remedial measures.

The Uniqueness:

The centre offers preschool education via the play group, nursery and day care as well as various after school activities that gives each area of the child's development a chance to bloom.

Apart from a theme based education the curriculum also introduces focus projects wherein children delve deeper into select projects. Special guests are invited - both Indian and from overseas - to bring about a deeper learning process. The preschool sessions are for 3 hours, daily.

Children do not grow holistically by just attending a preschool program since the time offered for the program cannot properly encompass all developmental areas. At preschool these areas are touched in brief with a bigger emphasis given to education. Hence the centre offers after school activities and holiday camps to bring about a growth process that targets other

areas of development in a better time appropriate way.

The infrastructure, personnel and services:

The centre is located in Frazer town, in a 2500 sq ft area designed with all facilities keeping in mind child safety and hygiene. Trained staff together with a child centric training methodology ensures learning in all developmental areas and readiness for mainstream learning. Staffs are also trained in CPR, basic First Aid, hygiene and child security.

The day care and emergency day care program offers a systematized program which is both educational and stimulating to the child.

The centre will be introducing LKG for the graduating students of nursery.

Vision:

The centre's long term vision is to become a community centre wherein, it becomes a hub for children and parents.

Chrysalis Hub is situated at 21/5, 2nd Cross, Spencer Road, Frazer Town, Bangalore - 560005. The centre can be contacted at 080-41170750 or e-mail enquiry@chrysalishub.com
